Questions to ask my doctor about adding Metformin to my treatment plan

Please print this page and discuss the following questions with your doctor.

Questions	Doctor response
Would Metformin be right for me in treating my diabetes? How does it work?	
If it's not right for me, why and what may be more appropriate?	
If starting a new medication: Is it safe to take with my other medications? Are there any medications I should stop when I start this one? Are there any side effects I should be aware of? What should I do if I have any of these side effects? Is it the most cost-effective choice? For example, does it have the least expensive copay? Is a generic form available? What strength are you recommending? How many times a day do I need to take the medicine? What should I do if I miss a dose? Do I need to avoid alcohol or any particular foods while taking this medicine?	
Kidney exams should be periodically performed on people taking metformin due to a relative contraindication for people with chronic or acute renal disease.
